

All-Phase®

Ration balancer pellet

All-Phase® is a protein, vitamin, and mineral supplement formulated to balance forage-only diets and fortify rations containing cereal grains.

All-Phase is a low-calorie, low-intake pelleted feed that is ideal for easy keepers. All-Phase contains high-quality protein sources to provide essential amino acids for muscle health and development, as well as natural-source vitamin E, B-vitamins, and yeast cultures for optimal health and wellness.

Features and Benefits

- Features a low-calorie, low-starch formula
- Provides necessary protein, vitamins, and minerals without excessive energy intake
- Contains KER Micronutrients, which complement fortified feeds when they are fed under the recommended levels
- Features a formula that is appropriate for metabolic or special-needs horses, including horses with insulin dysregulation, metabolic syndrome, laminitis, and obesity

Feeding Recommendations

All-Phase is designed to be fed in combination with forage, with or without unfortified cereal grains, and at a rate of 1–2 pounds per 1,000 pounds of body weight per day, depending on intensity of work, size, and body condition of the horse.

When fed with a small amount of another fortified feed, less may be required. Always provide clean, fresh water and high-quality hay.

Serving and Container Size

Serving Size

See feeding recommendations and example diets for more specific serving information. Contact a Kentucky Equine Research nutritionist to schedule a ration consultation.

Container Size

20 kg (44-lb bag)

Typical Analysis

Nutrient	per 1 lb
Digestible Energy	1.19 Mcal/lb
Crude Protein	26.0%
NSC	20.0%
Crude Fat	2.5%
Crude Fiber	7.0%
Calcium	3.0%
Phosphorus	1.5%
Copper	175 ppm
Selenium	2.0 ppm
Zinc	475 ppm
Vitamin A	20,000 IU
Vitamin D	2,000 IU
Vitamin E	325 IU
